Computer Methods in Applied Mechanics and Engineering 110 (1993) 403–404
North-Holland

Cumulative contents to Volume 110

Volume 110, Nos. 1–2, December 1993

Turbulent fluid flow and its incorporation into combustion processes
J. Argyris, H. Friz, B. Huurdeman and A. Laxander 1

Finite difference, boundary-fitted grid generation for arbitrarily shaped two-dimensional simulation areas
C. Fischer, G. Nanz and S. Selberherr 17

On the *h-p* version of the boundary element method for Symm's integral equation on polygons
V.J. Ervin, N. Heuer and E.P. Stephan 25

Computerized generation of surfaces with optimal approximation to ideal surfaces
F.L. Litvin, N.X. Chen, Y. Zhang, T.J. Krenzer and R.F. Handschuh 39

Some aspects of the statistics of a bilinear hysteretic structure under a non-white random excitation
P.K. Koliopulos, E.A. Nichol and G.D. Stefanou 57

Delamination of composites as a substationarity problem: Numerical approximation and algorithms
M.A. Tzaferopoulos and P.D. Panagiotopoulos 63

Artificial boundary conditions for 2D problems in geophysics
D. Givoli and S. Vigdergauz 87

Computer-based manipulation of systems of equations in elasticity problems with Gröbner bases
N.I. Ioakimidis and E.G. Anastasselou 103

A Douglas–Wang finite element approach for transient advection–diffusion problems
A. Khelifa, J.-L. Robert and Y. Ouellet 113

Compressible flow airfoil design using natural coordinates
P. Chaviaropoulos, V. Dedoussis and K.D. Papailiou 131

Natural convection in a differentially heated square cavity with a horizontal partition plate on the hot wall
A. Nag, A. Sarkar and V.M.K. Sastri 143

Thermal convection in vertical cylinders. A method based on potentials of velocity
F. Marqués, M. Net, J.M. Massaguer and I. Mercader 157

A two-dimensional time dependent Chebyshev method of collocation for the study of astrophysical flows
P. Godon and G. Shaviv 171

Volume 110, Nos. 3–4, December 1993

Quadrilateral finite elements for analysis of thick and thin plates
A. Ibrahimbegović 195

Design variations of nonlinear elastic structures subjected to follower forces
M.J. Poldneff, I.S. Rai and J.S. Arora 211

On the use of a segmental shooting technique for multiple solutions of planar elastica problems
M.G. Faulkner, A.W. Lipsett and V. Tam 221

An iterative penalty method for the finite element solution of the stationary Navier–Stokes equations
R. Codina 237

Numerical modelling of laminar-turbulent transition in the boundary layers under the influence of low free-stream turbulence intensities
D. Marinov and Z. Zapryanov 263

On the use of a modified Newton method for nonlinear finite element analysis
A. Forsgren and U. Ringertz 275

A fast boundary element method for the two-dimensional Helmholtz equation
Y. Yan 285

Flexural vibration of shear deformable circular and annular plates on ring supports
K.M. Liew, Y. Xiang, C.M. Wang and S. Kitipornchai 301

Divergence of a rotating shaft with an intermediate support and conservative axial loads
H.P. Lee 317

A discontinuity-capturing crosswind-dissipation for the finite element solution of the convection-diffusion equation
R. Codina 325

A stable bilinear element for the Reissner–Mindlin plate model
M. Lyly, R. Stenberg and T. Vihinen 343

Improved versions of assumed enhanced strain tri-linear elements for 3D finite deformation problems
J.C. Simo, F. Armero and R.L. Taylor 359
